PROCEDURAL LAB

This immersive, human cadaver lab is designed to help strengthen critical skills for the EMS professional and includes hands-on learning for:

- Hemorrhage control
- Advanced airways
- Gross anatomy

"It's one thing to be competent in a skill, but it's more important to be confident in that skill. This lab instills that confidence." - T. Wilson

The Arkansas Ambulance Association and the Arkansas EMT Association are pleased to once again partner with Paragon Medical Education Group to bring the hands-on cadaver lab back to Arkansas. The single session laboratory environment will touch on those skills and knowledge that every EMS professional needs. Over the course two days, 200 providers from across the state will hone their knowledge and skills in an immersive four hour course. Don't delay! Register for the Paragon Procedural Lab today!
